

Smart \$aver® Pool Energy Efficiency Incentive Program

Save big on your electric bill with a new ENERGY STAR® qualified pool pump.

Upgrade your pool pump. Get \$300.

Variable-speed pool pumps work at the minimum speed necessary to clean your pool. This means they use less energy, make less noise, last longer and actually filter your water more thoroughly.

Why an upgrade makes sense:

- Reduces pool energy use by **50 to 70 percent****
- Saves you **\$200 a year** on average†
- Improves filtration and prolongs equipment life
- Reduces operating noise
- **\$300 rebate** from Duke Energy

Did you know?

Inefficient, single-speed pool pumps consume up to 20 percent* of a home's total annual energy usage. Only your central air conditioner uses more power in the summertime. Upgrade today and **cut your pool-related energy use in half!**

Questions? Call **866.507.3496** or email **VSPumpIncentive@duke-energy.com**.

* U.S. Energy Information Administration

** U.S. Department of Energy

† Energystar.gov Savings Calculator

Energy and cost savings are based on U.S. Department of Energy and ENERGY STAR calculator estimates.

Actual savings may differ from those estimated due to variations in individual energy use habits, size of pool and pool pump model.

How it works:

STEP ONE: **Call one of our participating contractors**

Contact one of our trusted network of participating contractors to help you pick your new ENERGY STAR qualified variable-speed pump for your pool.

STEP TWO: **Make improvements**

The participating contractor will install and program your new variable-speed pump to obtain adequate filtration, in-pool circulation and water clarity while using the lowest possible motor speed. Enjoy the benefits of your new pump for years to come. On average, a new variable-speed pump will last three years longer than a traditional pump.

STEP THREE: **Get your cash**

Your contractor will help you complete your application. You submit your application and your rebate check comes in the mail.

Eligibility requirements:

To be eligible, (1) you must be an electric service customer residing in a single-family residence with a new or existing in-ground swimming pool. Customers living in apartments and multifamily homes are not eligible at this time; (2) Your new variable-speed pool pump must be installed and operable before you submit your rebate application; and (3) your rebate application must be submitted within 90 days of installation.
